Project Experience

iFuture Globistic Enterprise Limited.

Technical Manager - Operations

Done Company inhouse projects(websites) and managed team to come tasks intime.

Environment: HTML5, CSS, JavaScript, JQuery, Sql server, Codeigniter.

GREENLINE LABS Pvt Ltd.

Junior Web Developer

Project Detail: Traumatic Brain Injury(TBI)

The purpose of this project is to overcome the drawbacks of manual system and patient safety .This project improves the communication between level 3,2,1 Hospitals and also track the patient condition from the time of accident. For this we did a Web dashboard for Doctors,Nurses and Ambulances(Android App) to all levels.

Environment: HTML5, CSS, JavaScript, JQuery, Sql server

Project Detail: Defend against online password guessing attacks” (in java).

Authentication is the process of identifying an individual, usually based on a username and password. We generally use alphanumeric passwords which are mostly vulnerable to attacks like Dictionary attack, even easy to guess and hard to remember. Graphical passwords are one of solutions which provide an alternative to alphanumeric passwords in which users use a series of selectable images on successive screen pages, in a specific order, to authenticate themselves. This method is advantageous as compared to other traditional methods as people are better at memorizing graphical passwords than text-based passwords. Also it is more difficult to break graphical passwords using the traditional attack methods as security of the system is very high.

Human brain is good in remembering picture than textual character

Environment: Windows XP, Java, SQL Server 2005

Personal Information

Date of Birth: 21-June-1993 || **Marital status:** UnMarried || **Languages:** English, Telugu,Tamil,Hindi
