Objective

Looking for an opportunity to serve an organization that could utilize my analytical and software skills to increase the efficiency and profitability of the organization.

Summary

- Having **5 years** of experience in development, deployment, build and release of different types of applications using **MS.NET Technologies**.
- Strong knowledge on **OOPS Concepts** and its implementation using **C#**.
- Developed web applications using **ASP.NET**.
- Good Working knowledge on **SOAP** services, creation, testing, and integration.
- Strong working knowledge on data access technologies **ADO.NET**.
- Extensively worked with different query languages like **SQL**.
- Good involvement in defining and using the database objects like **Tables, Procedures** by Using **SqlServer2014/ 2008**.
- Good knowledge **Ajax** using **jQuery,Angular Js**
- Knowledge in **React JS**
- Working with Version Controlling Tool **TFS**.
- Good in working with Visual Studio **IDE 2017/ 2012/2010**, **SqlServer2014/2008** studio.

Work Experience

- Working as .Net Developer in Avya Inventrax India Pvt Ltd, Visakhapatnam from Nov 2016 – Till Date.
- Worked as .Net Developer in Sridha Technologies, Visakhapatnam from Nov 2015-Nov 2016.

Education

- **MSC (Computer Science)** at Chaitanya Degree & P.G College For Women, secured **68%** of marks in 2008.
- **BSC (MSCS)** at Chaitanya Degree & P.G College For Women, secured **65%** of marks in 2006
- **Intermediate** at A.V.K Jr college, secured **71%** of marks in 2003.
- **SSC** at Siddartha Public School , secured **70%** of marks in 2001.

Technical Skills

Languages	: ASP.NET, HTML5, CSS3, JavaScript , JQuery,Angular JS,React JS
CSS Framework	: Bootstrap .
Tools	: Visual Studio 2017,Visual Studio Code
Software Version Control	: TFS
Databases	: MS-SQL Server Management Studio
Operating Systems	:Windows 7/10 .

Project: 1#

WMS Projects	
Clients	IndAutoGroup Bangalore, Nilkamal Mumbai, VIP Mumbai, FalconwMS_3PL_SL
Environment	Visual Studio 2017, Asp.Net, C#.Net, TFS.
Database	SQL Server
Role	.Net Developer
Team Size	6
Description: <p>The product is based on the Warehouse Management System to keep track on the Inventory.</p> <p>FalconWMS is an enterprise grade advanced warehouse management system that provides seamless visibility of inventory from the time it enters the warehouse until it leaves the facility. FalconWMS focuses on increasing productivity, maximizing efficiency, improving inventory accuracy and reducing costs.</p> <p>FalconWMS supports multi-site warehousing using Barcode and Radio Frequency (RF) Technologies. This suite covers all significant warehousing activities such as receiving, putaway, inventory management, multi-UoM conversions, order fulfillment, quality control, and location planning along with picking, checking, packing and shipping. Seamless integration with all major ERP's.</p> <p>Components: Inbound Module (purchase order, supplier invoice, inbound processing, GRN updates, and put-away strategies), Order Processing and inventory system (Goods-in and Goods-out), and Outbound Module (delivery pick note, Invoice generation, suggested picking, picking strategies, PGI updates).</p>	
Responsibilities: <ul style="list-style-type: none">➤ Involved in Design, Coding in .NET Application using C#, and deploy the code successfully.➤ Good in design of controllers using C#.➤ Designed and integrated Web services SOAP.➤ Involved in design and definition of database objects, Tables and Procedures using SqlServer 2014/2008.➤ Used Version Controlling Tool TFS.	

Project: 2#

School Management	
Clients	Guntur
Environment	Visual Studio 2017 IDE, Asp.Net, C#.Net, Angular JS, Sql Server 2008.
Role	.Net Developer
Team Size	2

Description :

School Management System will organize work inside school and Proposed system will do the following tasks:

- Insert student's information such as student name, student number, address etc.
- Insert employee's information such as employee name, number, address etc.
- Insert section's information such as section name etc.
- Insert marks for each student in each subject he/she taken.
- View data about certain student and can edit it like adding or removing a student. Maintain attendance, fees.

Responsibilities:

- Involved in Design, Coding in .NET Application using **C#.Net**
- Used **ASP.NET** and SQL Server **2008** as backend database for web application development.
- Designed and developed the database in SQL Server 2008.
- Involved in design and definition of database objects. **Tables, Joins, Procedures**, using SqlServer 2008.

Project: 3#

CCC	
Clients	Central Circle Co.-Kuwait
Environment	Visual Studio 2017, Asp.Net, C#.Net, TFS.
Database	SQL Server
Role	.Net Developer
Team Size	9

Description:

The product is based on the Warehouse Management System to keep track on the Inventory.

FalconWMS is an enterprise grade advanced warehouse management system that provides seamless visibility of inventory from the time it enters the warehouse until it leaves the facility. FalconWMS focuses on increasing productivity, maximizing efficiency, improving inventory accuracy and reducing costs.

FalconWMS supports multi-site warehousing using Barcode and Radio Frequency (RF) Technologies. This suite covers all significant warehousing activities such as receiving, putaway, inventory management, multi-UoM conversions, order fulfillment, quality control, and location planning along with picking, checking, packing and shipping. Seamless integration with all major ERP's.

Components: Inbound Module (purchase order, supplier invoice, inbound processing, GRN updates, and put-away strategies), Order Processing and inventory system (Goods-in and Goods-out), and Outbound Module (delivery pick note, Invoice generation, suggested picking, picking strategies, PGI updates).

Responsibilities:

- Involved in Design, Coding in .NET Application using **C#**, and **deploy** the code successfully.
- Good in design of controllers using **C#**.
- Designed and integrated **Web services SOAP**.
- Involved in design and definition of database objects, **Tables and Procedures** using SqlServer 2008

Project: 4#

Matrimony Website	
Clients	Arundhati Matrimony -Vizag
Environment	Visual Studio 2017,C#.Net
Role	.Net Developer
Team Size	2
<p>Description :</p> <p>The main objective of Matrimonial Web application is to provide Grooms and Brides with excellent match making experience by exploring the opportunities and resources to meet true potential Partner.</p> <p>It helps the user by providing profiles of perspective “Bride” or “Groom” and other information regarding them online.
