Summer Internship:

I have done My Summer Internship in the company Unbound Learning in the duration of 6th May - 10th June 2019 located in Secunderabad, Jubilee Enclave.

Project:

Design and development of a website for a shopping site that allows users to shop online. Users can get info like order details, cart details etc. I have also included e-commerce in our project using HTML, CSS.

Role: I connected the database to the website and introduced the chatbot.

Final Year Project:

I have done a final year project based on the Internet of Things. In this project I have made it possible to connect different home appliances with the Internet by which we can handle them from any place wherever the internet is available using Raspberry Pi and coded it in Python.

Role: I have done the testing and simulation part of the project.

Project:

Menu bar for finding area / perimeter of different shapes

Created a menu bar for finding areas of of different shapes using swings and applets in java.

Finding out student details

Using applets created a web page for finding out student details.
